

5 Things Your Chiropractor Should Do For You

Dr. Mooberry was presented the 'Rising Star' in 2007 and 2015 by the Colorado Chiropractic Association. This is one of their 'Chiropractor of the year' awards. So what are the 5 things your chiropractor should do for you to give you the best odds of success?

We Hope you find this information helpful. When you are ready to reach your next level of health and get back into life again, we would be more than happy to lead, coach and help you!

#1 - LISTEN!

We have heard from MANY, MANY of our patients that one of the MOST frustrating things that happen in a doctor's office is the doctor NOT listening to you, your concerns, your questions and your point of view. NOT here! Once you start in our office, you are part of our family and just like talking with a family member, we listen. We will answer your questions to the best of our abilities and sometimes that honestly means we need help for that answer. We listen and we always will. When you are looking for a Chiropractor- make sure they LISTEN.

Listening
=
Learning

#2 - Lead, Help, Coach

Winning teams always have at least one coach that can oversee the team, make sure the right players are called and lead the team to victory. Just like that team, our office is fully capable and willing to help lead you to your health goals and win. All good coaches can call changes in plans when necessary and also know when to stay the course to score. We will lead you, coach you and to be honest, sometimes give you a strong nudge for your best health.

We look forward to your next best decades and helping you along the way. When looking for a Chiropractor, make sure they have what it takes to lead and coach you to your goals.

#3 - Utilize the Latest Technology

One of the most important aspects of being able to lead you to your best health and regain your energy and life is to discover what is below the surface. When you take your car to a garage for an inspection they use computer based technology to determine what is not working best with your car.

We have invested in computer based technology also, that helps us go beyond your symptoms to evaluate how well your nervous system is functioning. As we say in our office, “We can look INSIDE of your body without having to LOOK inside your body”. This specific testing in our office is non-invasive, able to be reproduced and can be done in a short time. Using this technology gives us insights into YOU, your health and how well you can be. Be it from nerve scans or thermal scans of your skin and then determining if your muscles are working optimally. You will learn more about YOU than you have before. When looking for a Chiropractor, make sure they use the latest technology.

#4 - Have a Plan for You

Remember taking trips as a kid? Whenever you took off in the family car THE most important thing to have for that trip was a map as to where to go and a plan on how to get there. We will show you your “Patient Road Map” that gives you a guide and goal as to what your care will be. This plan is in no way cookie cutter, in that it is not that same for every person. Each person in our office is an individual and each plan is just for them. Just like those road trips as a kid. When looking for a Chiropractor, make sure they have a plan outlined for YOU.

#5 - Make sure the Chiropractor is a GOOD Chiropractor!

Over 14 years in practice, having been awarded 8 different awards by the Colorado Chiropractic Association over the last 14 years and helped thousands of people in his community. Dr. Isaac Mooberry still gets up early so he can push himself to help even more of his friends, neighbors and friends to be. You can also see over 200 5-star reviews on Google!

5 Things Your Chiropractor Should Do for YOU!

- Listen
- Help, Lead and Coach you
